

PARAPROSDOKIANS...

(Winston Churchill loved them) are figures of speech in which the latter part of a sentence or phrase is surprising or unexpected; frequently humorous.

Where there's a will, I want to be in it.

The last thing I want to do is hurt you. But it's still on my list.

Since light travels faster than sound, some people appear bright until you hear them speak.

If I agreed with you, we'd both be wrong.

War does not determine who is right - only who is left.

Knowledge is knowing a tomato is a fruit. Wisdom is not putting it in a fruit salad.

To steal ideas from one person is plagiarism. To steal from many is research.

In filling out an application, where it says, 'In case of emergency, notify:' I put 'DOCTOR.'

I didn't say it was your fault, I said I was blaming you.

Women will never be equal to men until they can walk down the street with a bald head and a beer gut, and still think they are sexy.

Behind every successful man is his woman. Behind the fall of a successful man is usually another woman.

A clear conscience is the sign of a fuzzy memory.

You do not need a parachute to skydive. You only need a parachute to skydive twice.

Money can't buy happiness, but it sure makes misery easier to live with.

I used to be indecisive. Now I'm not so sure.

You're never too old to learn something stupid.

To be sure of hitting the target, shoot first and call whatever you hit the target.

Nostalgia isn't what it used to be.

Change is inevitable, except from a vending machine.

Where there's a will, there are relatives.

I'm supposed to respect my elders, but its getting harder and harder for me to find one now.

Tanker Hire: (Richard) 07976 811 215, Spares: (Daniel) 01538 308 008

Modified Aeration System

Although most non tipping tankers require aeration in the base to fluidise the product, some products are either very free flowing or are heat sensitive. For these applications we have developed a system where the aeration is only available when required, at other times there is a smooth, non-aerated surface.

Items For Sale

Although we have sold most of the Tankers recently advertised, we still have two remaining for sale or hire at very economic rates.

Also

Volvo 2nd output p.t.o. type PTRD/D1

We now have a few GHH CS80 underslung power packs available

Heavy Duty Hoses

With construction material, as in every other aspect of life today, new products are being developed which are more sophisticated and complex than the materials that they supersede. As a result, methods of handling them are frequently more challenging, often because the new materials are a compound of different components, some of which are very abrasive. This poses problems when handling them in powder tankers due to rapid degradation of the delivery hose, sometimes even after a few loads.

We have been aware of the problem for some time and have been trialling a number of different hoses which we believed could solve the problem. We are pleased to say that we now have available a delivery hose which has been field tested for several months and proved to extend the life of the hose by a very significant extent. The hoses, which are anti-static wired, are available from 51mm i.d. to 102 i.d.

Pinch Valves

We are always looking at ways of extending the range of parts offered by our stores to meet the requirements of our customers.

Many of our customers are users of pinch valves in non-tanker applications, so to cater for this market we now offer a choice of this type of valve ranging in size from 2" to 6" and of designs to cover food, brewing, pharmaceutical, construction, sewage, agriculture and vacuum applications. We illustrate just two of the types of pinch valve that we are now offering.

Examples of pinch valve now being sold

For more information on all stores related matters, please call Gareth on 07813 642006.

Tipping Skeletal Trailers

We have now taken the first delivery of the order for a significant number of 30ft. tipping skeletal trailers, which we first mentioned in a previous edition of the newsletter. The trailers are being fitted with underslung power packs and will soon be available for hire. As an associated service we also have a number of demountable tanks, which can be used in conjunction with these trailers, and these will be equipped with front loading hatches so that they can be used for carrying sugar, if required.

There are a number of applications that we are considering for these trailers and providing a range of demountable bodies to go with them, including animal feed bodies. We believe that the pressure for maximum utilisation of fixed costs makes the flexibility of this service very attractive.

Please ring Ian on 07976 839733 for more details.
